

## **Winter 2011 Student-Initiated Referendum Questions**

### **Question Regarding TVMcGill Fee Renewal**

Whereas TVMcGill is the only video media production service at McGill University that provides filming and editing services for the McGill community to publicize and promote the interests of the McGill community

Whereas TVMcGill is the only student-run film and television production service at McGill University dedicated to providing resources and training for the McGill community to gain valuable hands-on experience in media/audio-visual production

Whereas TVMcGill is dedicated to providing news and entertainment for the McGill community by covering a wide range of student events including campus life, student elections, and its own original content through the TVMcGill.com website and various closed circuit televisions across campus

Whereas TVMcGill wishes to continue to improve the invaluable services and opportunities it offers the McGill community and expand to impact more people in it

Whereas the current budget for TVMcGill encumbers its ability to improve as a video content production service for the McGill community due to the substantial costs associated with acquiring and maintaining adequate equipment for video content production

Be it resolved that TVMcGill student television fee is renewed by an opt-outable student levy for all full-time and part-time undergraduate students studying at the downtown campus for the amount of \$0.10 per student per credit per semester, for the next five academic years starting from the Fall 2011 semester up to and including the Winter 2016 semester.

### **Question Regarding the Creation of a Fee for the McGill International Student Network**

Whereas MISN's mandate is to welcome new and existing international students to McGill and help them integrate into life in Montreal

Whereas MISN organizes a wide range of fun events and trips that appeal not only to the international and exchange student population but to the entire student body at McGill

Whereas MISN is the largest service under SSMU

Whereas MISN receives no funding from any other body at McGill and thus has to run events and trips at cost, which seriously hampers its potential as a service for international students.

Do you agree to a \$0.50 opt-outable fee from Fall 2011-Fall 2015 in order to help MISN better fund its activities and serve the student population to the best of its ability?
