- Electricity provided at Lounge location.
- Length: 60" Width: 30"

\$300 per day

Student Lounge table

Elevator table

Table Locations

Display and Table Guidelines

Kiosk

- The kiosk is bolted to the floor and cannot be moved. Stands, tables or displays are not to be placed in front of the Kiosk out of fire egress concerns.
- One power plug is available for use on the metal stand behind the kiosk. Signage on the stand behind the kiosk may not be covered or changed.
- Small stands or vertical banners may be placed at the edges of the kiosk provided they do not cause interference with people ascending the stairwells on either side.
- A banner or signs may be placed in front of the kiosk, hung from the counter, or displayed on top of the counter.
- Sponsorship representatives are expected to remain behind or within arms-reach from the front of the kiosk. Milling about other parts of the building or grabbing attention by blocking common traffic paths is prohibited.

Regular Tables (2)

- There are two tables located on either side of the kiosk – one next to the elevator and one beside the student lounge.
- These tables are chained to the wall. They may be rotated out 90 degrees to face people entering the building (shown in photos on page 1).
- Care should be taken to not block any traffic paths in and around the tables. Placement of the table or other materials (including representatives themselves) that may block or redirect traffic in or out of the building is prohibited.
- The SSMU reserves the right to request sponsors to move there items if they are deemed to be in the way, offensive or inappropriate.
- Power is available via extension cords at these tables. Just ask us to provide them for you.

Please contact **Corina Sferdenschi** to sign the contract for your table booking.
